SUMMARY

I am a passionate Java Full-Stack Developer currently pursuing a B.Sc. in Computers and Informatics. With a solid foundation in both front-end (ReactJS) and back-end (Spring), I excel in building responsive web applications. My experience includes developing RESTful APIs, implementing security features, and utilizing modern Java frameworks. I thrive in collaborative environments and seek to continuously enhance my skills through innovative projects

EXPERIENCE

Java Full-Stack Developer

Academic & Personal Projects

01/2024 - Present Zagazig, Egypt

Involved in developing and managing a variety of Java-based web projects

- Built full-stack web applications using React.js (Frontend) and Spring Boot (Backend)
- Developed RESTful APIs using Spring Boot with layered architecture (Controller, Service, Repository)
- Implemented authentication & authorization using Spring Security and JWT
- Worked with JPA/Hibernate for relational database persistence (MySQL, PostgreSQL) and relational mapping
- Handled exception management, validation, and clean API response structuring
- Integrated frontend with backend using Axios and managed authentication flows
- Worked with client-side state management tools like (Context API, Redux Toolkit, Zustand)
- Integrated Frontend (Jest, Vitest, React Testing Library) and backend (@SpringBootTest, JUnit, Mockito) Testing libraries
- Worked with API Testing Tools Like Postman to validate API responses

EDUCATION

B.Sc. in Computers and Informatics

Zagazig University

10/2022 - 05/2026 Zagazig, Egypt

PROJECTS

Front-End Projects (E-Commerce, Movie Explorer, Blogging Platform)

01/2024 - 12/2025 Zagazig, Egypt

React.js Frontend Projects focused on client-side development

Back-End Projects (Healthy Restaurant System, Task Tracker)

01/2026 Zagazig, Egypt

Spring Backend projects to enhance skills in server-side development

KEY ACHIEVEMENTS

Optimized API Efficiency

Participated in development of API reducing response time by 30%.

Enhanced Security Measures

Implemented security protocols reducing breaches by 40%.

Project Management Excellence

Delivered tasks within deadlines improving team efficiency.

Improved Application Performance

Increased application performance by 25% using advanced caching.

SKILLS

Java	React	Java Spring	
SpringBoot	REST	JWT	JPA
Hibernate	RDBMS	PostgreSQL	
Axios	Redux Toolkit	Jest	
JUnit	Postman	JavaScript	
HTML	Redux	Bootstrap	
Tailwind	Git	Visual Studio Code	
API Design	Agile	JIRA	Docker
Redis	Mockito	Spring security	
Microservices	TypeScript	CI/CD
